Notes

A. Highlighted dates show instrument changes (for any of the telescopes). Total in December: 8 (2 on weekends).

B. Names underlined in yellow indicate certified (or certified observer listed on observing request).

C. Program names in black on the 31" are robo mode, and those observers are considered certified.

D. SCHLEICHER – Comets

E, TYCHNER – H Alpha

F. LEVINE – KBOs

G. MOSKOVITZ – V-type asteroids

H. ANDERSON – NURO by ROBO

SPECIAL NOTE #1: Dave Schleicher needs 31" comet observations between Dec 1 and 15 and 23-31 on nights when he does NOT have CCD time on the 42". These are local dates

of Dec 1,2,3,4,5,6,7,10,11,12,13,14,15,23,24,25,26,27,28,29,30,31, and impact nights used by SKIFF, VANBELLE, ANDERSON. The MILINGO nights (Dec 12-15) are not easily interruptable. During December, Dave needs 30m sets on comet 46P every 2 hours whenever it is above 2 air masses.

SPECIAL NOTE #2: Dec 21 and 22. ODELL needs the last three hours for W Cor

SPECIAL NOTE #3: Kelley (Und) wants to observe three comets (21P, 38P and 46P) once a night, every three nights whenever robo is on the 31".

SPECIAL NOTE #4: MOMMERT has asked for "2 nights spread over the quarter". This is not clear and I need to sort this out with him.
