- Notes
- A. Highlighted dates show instrument changes (for any of the telescopes). Total in July: 4 (1 on weekends)
 - B. Names underlined in yellow indicate certified (or certified observer listed on observing request).
 - C. Program names in black on the 31" are robo mode, and these observers are considered certified.
 - D. TRILLING – REU students
 - E. NURO by ROBO

SPECIAL NOTE #1: Kelley (Umd) is observing two or three comets once a night, every three nights, whenever ROBO is on the 31" for ~20-30m per night.
 SPECIAL NOTE #2: Bauer (Umd) is observing four comets/week using ROBO; about 15m per target.
 SPECIAL NOTE #3: Schliecher is observing comet G/Z Jul 1 to Jul 20 (31"/ROBO)
 a) 30 min every 2.5 hours when comet is above 2.0 airmass and moon is down or far away
 b) Do not observe when Schliecher is on the 42"
 SPECIAL NOTE #4: Mommert wants to do light curves of asteroids with 31"/ROBO in "chunks" totaling ~3 nights. Details TBD.
